<p><u>KS1 Topic: Science</u></p> <p><u>Living things and their habitats</u></p>		
<p><u>Lesson 5</u></p> <p><u>Microhabitat</u></p> <p>Identifying a variety of plants and animals in their microhabitat.</p> <p>Activity - create your own minibeast hotel.</p>	<p><u>Lesson 4</u></p> <p><u>Microhabitat</u></p> <p>Identifying a variety of plants and animals in their microhabitat.</p> <p>Activity - investigate a microhabitat and identify the minibeasts they find. Tally results in a table.</p>	<p><u>Lesson 3</u></p> <p><u>Local habitat</u></p> <p>Identifying a variety of plants and animals in their local habitat.</p> <p>Activity - draw or make a local habitat, identifying the features you would find as well as the animals and plants.</p>

Lesson 7

Working together, staying alive

Understanding how animals and plants depend on each other to survive in a habitat.

Activity - labelling an image to explain how the living things rely on each other.

KS1 Topic: Science

Living things and their habitats

Lesson 8

Carnivores, Herbivores and Omnivores

To consolidate understanding of animals which are carnivores, herbivores and omnivores.

Activity - correctly group the animals into the categories based on what they eat.

Lesson 9

Food Chains

Identifying how animals obtain their food from plants and other animals through a simple food chain.

Activity - drawing or making food chains from the living things provided

Lesson 6

World Habitat

Identifying how a living thing is suited to its habitat and that the habitat provides for their basic needs.

Activity - make a habitat model or create a poster to describe the world habitats.
